## What are you guaranteed by working with

### T E C H N O S K L O Ltd. ?

*...or the 4 x 4 building blocks of cooperation*

The company T E C H N O S K L O Ltd. is profiled in four basic production areas:

- **Laboratory glass**
- **Technical glass**
- **Health care products**
- **Chandelier components**

Please allow us to highlight these four basic building blocks of cooperation in each area, which comprise our guarantee for your long-term satisfaction:

#### 1) Active business cooperation

Thanks to the close connection between the business team and production, you will always receive a prompt response to your inquiries, **at most within three business days**. This concerns our standard manufactured assortment; a very rapid adjustment is also possible for all technological, business and delivery conditions.

If a customer's requirement is for a non-standard manufactured product, we undertake the initial verification of technological possibilities and subsequently adjust drawing documentation and delivery deadlines. After the documentation has been adjusted, we will prepare a special price offer for the given case.

For your quick orientation, we always have a prepared printed catalogue and up-to-date web pages with our products and price lists.

#### 2) First-class quality

The company Technosklo Ltd. has presented its high-quality manufactured products on the market for a long time. This has been assured through:

- Processing high-quality entry raw materials
- Rigorous assurance of precision in production parameters (up to **0.005 mm tolerance**)
- High qualification standards for production staff
- Quality output control

- 
- Everything is supported by ISO certification for processes with regular annual renewal

### 3) Innovation and development

The company Technosklo Ltd. owns a development platform, which provides:

- Production of machinery and equipment providing precision in production parameters hand-in-hand with sufficient productivity during processing
- Preparation of foundations and samples for non-standard production orders
- Regular revision of all production equipment
- Flexible modification of production equipment during changes in order structures

### 4) Stability

With us, you will find prospective long-term cooperation not merely thanks to the many years of tradition in our production, but also thanks to the fact that the current economic crisis has not affected the stability of the company.

We offer the following information as a clear guide for your decision:

- › Technosklo Ltd. exports to 60 countries around the world
- › We manufacture over 2,000 types of glass products
- › Total annual production exceeds 4 mil. units
- › The number of complaints has not exceeded a value of **0.05%** for a long time.

All the areas mentioned above would be verified best and completely via your personal experience. It would be our pleasure to cooperate with you on any new projects.

**Ing. Aleš Brůna**  
Managing Director

**Miroslav Brůna**  
Sales Director
